Chilli Appeal

Freestylers who know what they are doing will instantly love the new Chillis. 2 freestyle boards aimed 100% towards new school freestyle, making even the most difficult of moves easy. Best planing, fast acceleration and incredible pop with even the slightest foot pressure. From Vulcans to Burners these boards will give you the *edge*.

Twist, Slide and Style!

Key features:

The unchanged rocker-line stands the test of time and like the 3 generations before, it gives the best in early planing and fast acceleration.

A new more harmonic outline lets the Chilli slide and turn like a disc.

Flat Vee lets the water rip off cleanly during the most complex manoeuvres, plus with a slight additional double concave in the tip the new Chilli provide total fin first control.

The perfectly designed deck shape guarantees the best stance in all crazy moves. The slightly domed deck allows thin rails over the whole length without any loss of volume.

Tucked rails give a smooth ride, control and grip in turns. Thin rails let the Chilli turn like it was on rails.

The new tail shape combines the cut outs and spock tail with a whole new edge geometry. This gives the Chilli an amazingly free planing position, unbelievable pop and complete safety whilst sliding backwards.
