Interview

What was the main reason for your change to F2?

CYB (customise your board) is a sick project. The way where F2 wants to push the windsurf is exactly where I want to go. Giving a skate/underground image for our sport, for all the young wave riders and freestylers.

How do you want to support your new board sponsor?

With style, spirit and philosophy.

Riding on a ripping board, with a sick graphic, and always pushing the limit.

I am really impressed about the F2 team... Everybody is on the same line, young in the mind, working for the windsurfing love. Really nice feeling! And I know Patrik since 12 years, is crazy...

What is your main goal for 2007?

Pushing for the young generation, in their way, because they are the future. Windsurf is radical and extreme like skateboard, snowboard, wakeboard or the surf. I will always push for that...

How do you see windsurfing in general and competition wise in the next 3 years?

Windsurfing is coming back.

All a young generation is behind the sport to push the mentality, the level and the image.

The diversity of the discipline, the evolution of the contest format, the contact with the people and the nature.

All this points are the power and the identity of the windsurf, and this to us now, windsurfers, to give the good vibe...

My opinion on life: You have to life you're life every day full on, but take care, we all pay for those bad things we do...everything happens because of a reason...

Interview

You were already competing in the PWA tour some years ago.

What was the reason for a come back ?

I never had the chance to go for it 100% in the past, but now I've made my way and I think I've got the right Skills and Talent to be up there in the Top of this Sport.

What was the main reason for you to choose F2 as new board sponsor ?

F2 is and has always been a very big and recognised Brand, I would say, it's part of Windsurfing, and to be in the F2 Team is more than just being Sponsored.

How do you want to support your new board sponsor ?

I don't want to be just an "Employee/Rider" of the brand, I want to be a part of the brand, part of the image of the brand. I would like to be involved in Development/Testing/Designing...and of course, in bringing up Top results and International Coverage, so the brand gets even more prestige.

What is you main goal for 2007 ?

Be in the Top 10 of the PWA wave Tour and get as much as I can of International Coverage.

Where will be your main training spot during PWA off season in winter time ?

Tenerife, Gran Canaria, Fuerteventura / Canary Islands.
